London W2 6NB

26.09.14

Dear Sir/Madam,

I am writing to give my thanks to Belotti for successfully installing and supporting Nissan Design Europe with our 5-axis machining centre FLU4018.

Nissan Design Europe had very specific requirements to fit a machining centre into a restricted space which was done without any concerns or fuss.

This machine was justified by a significant change to our design process, allowing more models to be produced in a shorter time in multiple materials. After becoming familiar with the machine, I can now say that it has achieved its objectives and become a dependable part of our equipment. Any issues have been dealt with in a timely fashion, always with a satisfactory resolution.

We would always consider another machine in the future and are happy to recommend Belotti, which indeed we have leading to one of our suppliers ordering an machine, which in turn, helps our design process.

Yours Sincerely

Colin Hart
